## FIRST PROFESSIONAL B.H.M.S. EXAMINATION HUMAN PHYSIOLOGY AND BIOCHEMISTRY PAPER - II SUBJECT CODE: HOM UG-PB

TIME: 3 HOURS
INSTRUCTIONS: 1. ATTEMPT ALL THE QUESTIONS.

TOTAL MARKS: 100

2. DRAW DIAGRAMS WHEREVER NECESSARY. 3. FIGURES IN RIGHT INDICATES FULL MARKS

| Q - 1 | Mul   | tiple Choice Questions.                                  | (10)  |
|-------|---|--|---|
|       | $_{1}$ (1)  | Growth hormone is secreted by                            |   |
|       |   | [A] Pineal gland   | [B]Pituitary gland                            |
|       |   | [C] Hypothalamus   | [D]Adrenal gland                              |
|       | (2) Afferent neurons carry nerve impulses from                              |  |   |
|       |   | [A] CNS to muscles                                       | [B] CNS to receptors                          |
|       |   | [C] Receptors to CNS                                     | [D]Effector organs to CNS                     |
|       | (3)   | The functions of saliva include following except         |   |
|       |   | [A] Cleaning the mouth                                   | [B] Digestion of protein                      |
|       |   | [C] Killing bacteria                                     | [D] Digestion of lipids                       |
|       | (4) In which of the following organ in human body does the fertilization oc |  |   |
|       |   | [A] Uterus   | [B] Fallopian tube                            |
|       |   | [C] Ovary  | [D] Vagina                                    |
|       | (5)   | Which cells of the testes secrete testosterone?          |   |
|       |   | [A] Sertoli cells  | [B] Cells of germinal epithelium              |
|       |   | [C] Leydig cells   | [D] Secondary spermatocyte                    |
|       | (6)   |  |   |
|       |   | [A] Cornea   | [B] Lens                                      |
|       |   | [C] Retina   | [D] Iris                                      |
|       | (7)   | Dynamic equilibrium is maintain                          | ned by  |
|       |   | [A] Utricle and saccule                                  | [B]Vestibule                                  |
|       |   | [C] Semicircular canal                                   | [D] Spiral organ                              |
|       | Deficiency of which vitamin lowers the rate of calcium absorption fro food? |  | owers the rate of calcium absorption from the |
|       |   | [A] Vitamin D  | [B] Vitamin C                                 |
|       |   | [C] Vitamin B  | [D] Vitamin K                                 |
|       | (9)   | The nature of enzyme is                                  |   |
|       |   | [A] Carbohydrate   | [B] Lipid                                     |
|       |   | [C] Vitamin  | [D] Protein                                   |
|       | (10)  | Which of the following is known as "body building food"? |   |
|       |   | [A] Fats   | [B] Carbohydrates                             |
|       |   | [C] Proteins   | [D] Vitamins                                  |

## Q-2 Write Short Answers.

- (1) Regulation of pituitary hormones by hypothalamus
- (2) Action of parathormone
- (3) Reflex arc
- (4) Electrical events occurring at synapse
- (5) Composition and functions of bile
- (6) Menopause
- (7) Physiology of taste
- (8) Different types of carbohydrates

(50)

## Q-3 Write Long Answers

- 1. Describe the functions and regulation of Insulin.
- 2. Define tracts. Describe origin, course, termination and functions of corticospinal tracts.
- 3. Describe the composition and functions of gastric juice.
- 4. Define menstrual cycle. Describe the uterine changes occurring during menstrual cycle.
- 5. Describe the olfactory receptors. Describe the olfactory pathway.
